Medical Training Solutions

Medical Training Solutions is an organisation dedicated to providing medical training to improve confidence and competence in dealing with a medical emergency.

The emphasis is on creating a positive learning environment, with small group teaching to enable learners to perform the learned skills in a real-life situation.

Multidisciplinary groups are encouraged to attend the courses as most emergencies are dealt with by a multidisciplinary team.

Medical Training Solutions ensures that the educational experiences it provides are of the highest standard. Instructors are practising clinicians in specialised areas and provide current information reflecting up to date regulations and guidelines.

ALS Level 1: Immediate Life Support **ALS1**

Duration: 1 Day

This advanced life support course was developed to standardise the teaching of initial cardiac arrest management.

ALS Level 2: Advanced Life Support **ALS2**

Duration: 2 Days

This intensive course provides a standardised approach to resuscitation of adults.

ALS2 Recertification **ALS2**

Duration: 1 Day

The ALS2 recertification course is a refresher course for those that have completed and currently hold a current ALS2 provider certificate.

Paediatric Advanced Life Support

Duration: 1 Day

To provide healthcare professionals who have expertise in fields other than paediatrics but are occasionally tasked with attending to a sick child in a pre-hospital or clinical setting.

CPR and Defibrillation Update

Duration: 2 hours

To update basic life support skills. It can be provided onsite as a group booking. Included is revision of the Basic Life Support Algorithm to current ARC guidelines and plenty of hands-on practice.

Blood Collection

Duration: 2 hours online & 3 hours practice

The Blood Collection course provides participants with knowledge and skills required to perform venepuncture and blood specimen collection.

Wound Closure

Duration: 2 hours online & 3 hours practice

The Wound Closure Course provides suturing practice on animal material and simulated human skin.

PIV Cannulation

Duration: 2 hours online theory & 3 hours practice

The PIV Cannulation competency allowing maximum practice using cannulae and realistic training arms.

PIV Cannulation / IO Access / Blood Collection

Duration: 2 hours online & 3 hours practice

This course provides the knowledge and skills along with ample practice using cannulae, blood collection systems, bone injection units with realistic training arms and legs to perform these skills.

12 Lead ECG Course

Duration: 2 hours online & 4 hours practice

This workshop covers the basic skills and knowledge of recording & basic interpretation of 12-lead ECG and rhythm recognition.
